**UniBox is an intelligent access controller and hotspot gateway that provides complete control over your wired and wireless network. UniBox 3.1 helps network administrators centrally manage their networks, avoid unauthorized access, enforce policies and track real-time network activity.**

UniBox U-200 is an all-in-one controller appliance that combines the functions of a wireless LAN controller, hotspot gateway, AAA server, web server, load balancer, web logger, VPN server, policy server and firewall in a single box. It also comes with comprehensive reporting and analytics tools for analysing and tracking network activity of all users. UniBox can be deployed as a stand-alone appliance or can function with WiOS OSS/BSS. UniBox U-200 belongs to the family of UniBox controllers that are specially designed for managing network access in medium-sized venues like small hotels/inns, shopping malls, educational institutes and public Wi-Fi hotspots. U-200 is capable of handling 200 concurrent user sessions and is built on a reliable Linux platform to provide high availability and performance.
